

### Quick Details

Classification:Nitrogen Fertilizer

Type:Ammonium Sulphate

Other Names:Ammonium Sulphate Fertilizer

MF:(NH4)2SO4

EINECS No.:231-984-1 Ammonium Sulphate

Place of Origin: China (Mainland)

Release Type:Slow

State:Granular

Purity:99%min

Application:Agriculture

Brand Name:HAN HAO / OEM

Model Number:Ammonium Sulphate Fertilizer

Product Name:ammonium sulphate granular

KEW WORDS:price ammonium sulfate fertilizer

Color:White or accroding to your request

Appearance:ammonium sulphate/ammonium sulfate powder/granular/crystal

Certificate:SGS

HS CODE:3102210000

other application:fertilizer/textile/leather

### Specification

	Ammonium sulphate Granular	Ammonium Sulphate <u>Caprolactum</u> Grade
Items	Standard	Standard
Appearance	White Granular	White Crystalline
N	20.5%min	21%min
S	23.5%min	24%min
Fe	——	0.007%max
As	0.0002%max	0.0005%max
Moisture	1.5%max	1.0%max
Free acid	0.3%max	0.05%max
Water insoluble matter	——	0.02%max
Size	2-5mm	——

### Application

Water soluble fertilizers in these areas are mainly applied to cash crops and,through higher yields and incomes, bring considerable economic benefits to the farmers using these products.In addition,Monband also participates in government tenders,thus assisting the government in meeting its water soluble fertilizer procurement goals.
